## Summary

Results-driven software engineer with over five years of experience, consistently delivering high-quality solutions. Proven expertise in full-stack development, passionate about leveraging innovative technologies to optimize performance and exceed project goals. Adept at collaborating with cross-functional teams to drive successful software implementations.

## Experience

### Startup

Jul 2023 - Present (6 months)

- Led the development as a full-stack developer for a comprehensive contract management system, streamlining the efficient and user-friendly handling of contracts.
- Implemented features enabling seamless payment processing for tenants and timely disbursements to property owners, enhancing financial transaction management within the system.
- Incorporated advanced tracking mechanisms for managing and monitoring tenant complaints, ensuring swift resolution and improved customer satisfaction.
- Designed and integrated a user-friendly scheduling module to facilitate easy and organized appointment booking for property visits, contributing to a more effective property management experience.

### BIBLE APP

Self-employed

Jan 2023 - Present (1 year)

- Developed a robust Bible application with React Native, fostering deep user engagement with sacred texts.
- Introduced innovative features such as personalized note-taking, verse highlighting, and favorites to enhance the user's connection with scripture.
- Integrated a distinctive Chant Desperance section, allowing seamless exploration and search of chants within the application.
- Implemented a dynamic 'Verse of the Day' feature on the homepage, delivering daily inspiration and contributing to a rich and spiritually fulfilling user experience.

### Full Stack Developer

Tribal Consulting

Jan 2022 - Present (2 years)

- Specialized in code refactoring, ensuring improved code quality and optimizing existing applications for enhanced performance.
- Implemented robust security layers to safeguard web applications, prioritizing the protection of sensitive data and user privacy.
- Successfully fulfilled client requirements by incorporating their feedback and desires into the

development process, ensuring a high level of customer satisfaction.
